Approved Van Up Fitter

Reefervan Van Insulation & Kits:

Reefervan insulation kits are made with 3" of high-grade EPS / Polyiso foam panel insulation which is machine pressed under high pressure to a smooth impact resistant FRP plastic "woven fibre" material, forming a durable composite panel for increased strength and durability.
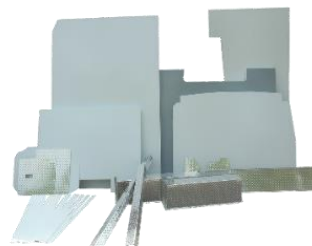

Extremely lightweight, all walls, floor, bulkhead and roof are 100% insulated and totally seamless.

No spray foam or heavy wood is used in the panel construction. Machine routing ensures a perfect fit to the van. Insulated panels are thermally balanced to the highest standards.

Reefervan Insulation provides excellent cooling performance in high ambient temperatures of 100°F (38°C). Matched together with our OEM Reefer product range, Reefervan guarantee this performance.

Insulate right the first time, Reefervan!

DIY Kits

FEATURES:

Heavy Duty Insulation 3" Thickness
- High thermal efficiency performance
- Fast pull down of temperature
- Lower reefer operating cost

Light Weight Insulation Panels
- Light weight, more cargo payload
- No wood framing or spray foam used
- Single piece modular panel construction
- Food grade ultra-smooth, no wall seams

Durable Design Features
- Load guard on walls, doors & wheel boxes
- Floor guard for forklift protection
- Durable resin flooring, long lasting, less wear
- Withstands heavy impacts & abrasion

Added Features
- 100% waterproof, fully washable
- Available in DIY Kit form for any van model
- 2 Year Product Warranty

Reefervan Reefer Products:

Reefervan Reefer products are designed to cool and freeze any make and model panel van.

High grade build quality and industry standard service components allow Reefervan to offer a quality, durable reefer product equal to other well-known brands in the market at a competitive price.

Easy to install, servicing can be carried out by any regular AC, HVAC or mechanical repair shop due to a simple "tech friendly" design. There are no complicated micro processors to diagnose or fail.

Replacement parts are lower in cost, compared to other brands in the market, with no compromise on quality or performance.

Coupled together with a Reefervan thermally balanced Insulation kit, our reefer product will cool your cargo to the right temperature all year round in the highest of outside ambient temperatures.

Superior cooling performance at a competitive price.

Reefer Product Features:

Superior Cooling
- High capacity cooling up to 11000 BTU
- Fast pull down of cargo area temperature
- Thermally balanced with Reefervan insulation

Premium Quality
- Tried and tested across North America
- High quality internal reefer components

Easy to Service
- Technician friendly – Easy to repair
- Maintenance - Easy service, lower cost
- Replacement parts – Lower cost price

It's all about SERVICE...!

Reefervan offer after sales service across Canada and the USA, offering a range of service plans to maintain your reefer over its service life. Extended warranty is also available for total piece of mind.
