Reefervan Modular Insulation

Reefervan have over 30 years of industry experience insulating and refrigerating panel vans. Introduced to North America in 2009, Reefervan premium insulation provides the highest quality and cooling performance available in the market today.

Precision CNC machine routed panels ensure a perfect fit

Standard 3" inches of high grade insulation means that all walls, floor, bulkhead and roof are 100% insulated and **"thermally balanced"** to the highest standard, ensuring perfect cooling performance in high ambient temperatures of 100°F. (38°C)

Reefervan will provide you with the right advice when refrigerating your van. Making the wrong choice of insulation will lead to your reefer package not cooling correctly. Reefervan guarantee this performance.

Insulate right the first time..... Choose Reefervan!

Insulation Standard Features

- **Standard Insulation of 3" Inches**
High thermal efficiency – No wood framing used in the construction of the insulation system
- **Light Weight Panel Construction**
More cargo payload
- **Load Guard on Wall & Wheel Boxes**
Heavy duty protection from impacts
- **Heavy Duty Resin Flooring**
Withstands heavy impacts and abrasion
- **Waterproof**
Totally 100% waterproof can be power washed
- **Drain hole**
Water drains easily from inside van
- **Food Grade Smooth Surface**
Insulation will not Harbor Bacteria
- **Fast Pull Down of Temperature**
35% Faster compared with other insulation systems on the market today
- **Lower Operating Costs**
Reefer operation is less – Reduced service cost
- **2 Year Warranty**
Standard on material and workmanship
